1. DRGGROUPERS.COM MANUAL

Looking for more information about DRGs, groupers in general, or our grouper product line in particular? Download our complete manual / catalog / reference as a PDF: drgman.pdf . Also available soon as a paperback book from Amazon.

2. HOW TO PICK A VERSION

Every year the US Federal government releases a new DRG version. The earliest version we sell through our on-line store is Version 10, which we call "f10" for Federal Version 10.

The official release is on October 1st every year and we usually release our implementation of the algorithm by October 15th every year.

Please specify which version you need for any of our products. Our software is backwardly compatible, so if you buy the version 20 grouper, that module can handle versions 10 through 20, *assuming that you have purchased the appropriate masks file.*

NOTE: We have support for versions 2 through 9, but demand is low enough that we do not clutter up our on-line store with them. You can purchase support for versions 2 through 9, but only by contacting us directly.

5. SOFTWARE LICENSES

Our standard client software license:

M+H Consulting, LLC, the parent company of DRGGroupers.com, grants to the purchaser a single CPU license for the accompanying software. The software may not be used on more than one computer at the same time. The purchaser shall not make copies of the software except for use as a backup.

The accompanying software is the property of M+H Consulting, LLC and may not be distributed. The software may not be distributed as part of an application or external website without the express, written

consent of M+H Consulting, LLC.

Our standard server software license:

M+H Consulting, LLC, the parent company of DRGGroupers.com, grants to the purchaser a single CPU license for the accompanying software. The software may not be used on more than one computer at the same time. The purchaser shall not make copies of the software except for use as a backup.

The software may run on only one CPU, "the server," at a time, but no restriction is placed on how many client CPU's can access the server at a time. However, the purchaser may not put the software on a server to which there is network access outside of the purchaser's organization. In this context, "organization" refers to parent companies and their wholly-owned subsidiaries and business units.

The software is the property of M+H Consulting, LLC and may not be distributed. The program may not be distributed as part of an application or external website without the express, written consent of M+H Consulting, LLC.
