1. DRGGROUPERS.COM MANUAL

Looking for more information about DRGs, groupers in general, or our grouper product line in particular? Download our complete manual / catalog / reference as a PDF: drgman.pdf . Available soon as a paperback book.

2. HOW TO PICK A VERSION

US Federal (aka CMS or HCFA) DRG versions are released in October of every year. Version 3 (the first version we support) was released in October of 1985. So if you are using calendar years, 1/1/2001 - 9/30/2001 would be covered by version 18 and 10/1/2001 through 9/30/2002 would be covered by version 19. And so on.

3. CGI-DRG DEMO: TRY BEFORE YOU BUY

Take out Web-based (CGI) grouper out for spin: we have put up our latest CGI grouper on the web so you can try it out. Note that the HTML this program produces is deliberately barebones, so that it can be processed by just about any browsers. Hooks for using local stylesheets are available, so that CGI-DRG's output would better match your site.

4. HOW TO PICK A PRODUCT

- **If you are looking for a one-time assignment of DRGs** to a particular data set, you should probably use our DRG Assignment Service).
- **Data analysts** tend to purchase one of our batch grouping products . These products allow an entire data set to be grouped.
- **Programmers** who need to provide grouping as part of their in-house applications usually want to buy one of our program-callable modules . (Programmers who want to develop commercial applications which feature grouping by our grouper need to arrange for a reseller's license.)

ICD9cm short file	34 character descriptions for ICD9cm codes	\$25	N/A
N/A			

6. M+H SOFTWARE LICENSES

Our standard client software license:

M+H Consulting, LLC grants to the purchaser a single CPU license for the accompanying software. The software may not be used on more than one computer at the same time. The purchaser shall not make copies of the software except for use as a backup.

The accompanying software is the property of M+H Consulting, LLC and may not be distributed. The software may not be distributed as part of an application or external website without the express, written consent of M+H Consulting, LLC.

Our standard server software license:

M+H Consulting, LLC grants to the purchaser a single CPU license for the accompanying software. The software may not be used on more than one computer at the same time. The purchaser shall not make copies of the software except for use as a backup.

The software may run on only one CPU, "the server," at a time, but no restriction is placed on how many client CPU's can access the server at a time. However, the purchaser may not put the software on a server to which there is network access outside of the purchaser's organization. In this context, "organization" refers to parent companies and their wholly-owned subsidiaries and business units.

The software is the property of M+H Consulting, LLC and may not be distributed. The program may not be distributed as part of an application or external website without the express, written consent of M+H Consulting, LLC.
